

LC 1590 - ANODIZED ALUMINUM TOP POST

Features:

Top post composed of $\varnothing 76-61$ mm vertical tube for attachment to pole. $\varnothing 61$ mm curved arm with $\varnothing 42$ mm threaded light fixture attachment. Aluminum decorative fitting. Stainless steel hardware.

Anodizing

The anodizing process consists of the formation of the oxide layer on the metal surface by means of electrochemical method. Anodizing not only durably protects the pole from external factors, but also provides an option to color the aluminum 10 colors, each with the option of brightening.
