

## LC 0501 - ANODIZED ALUMINUM WALL BRACKET

### Features:

Bracket composed of aluminum plate for wall mounting, curved arm equipped at its end with attachment with Ø60 mm threaded hole for the attachment of the light fixture. Straight connecting tie rod made of aluminum. Stainless steel hardware.

### Anodizing

The anodizing process consists of the formation of the oxide layer on the metal surface by means of electrochemical method. Anodizing not only durably protects the pole from external factors, but also provides an option to color the aluminum 10 colors, each with the option of brightening.
