

LA 02 S E27 - SCHEDA TECNICA

CORPO ILLUMINANTE

Lantern artistic in casting of aluminum conforming to the standards EN 60598-1-2-3 suitable for being mounted on a bracket. The lantern can be supplied with frosted or clear PMMA screens and in the CUT-OFF version with the insertion of a glass frame in sheet metal and satinized tempered glass 4mm.

STRUTTURA

Lighting body formed by a supporting frame, a top cap with attachment for suspension by means of a threaded sleeve 3/4 Gas on the top burner and a four-legged base which acts as support, all in casting of aluminum (UNI EN 1706).

Inside there is a white painted aluminum optical plate, a lenticular reflector in aluminum with 99.90% purity, a zinc-plated steel mounting bracket and a cable clamp in rubber IP67.

DIMENSIONI

325x656 mm

PESO

8,5 Kg tutto incluso.

CARATTERISTICHE TECNICHE IMPIANTO

Wiring with integrated thermal protection, removable fuse, fuse, manual disconnector of the supply, silicon cables with double insulation and E27 lamp holder.

CICLO VERNICIATURA

Decapage and washes with demineralized water, nanotechnology process, drying at 160°C, painting with polyester powder and polymerization in oven at 200°C.
